Re: Phase 4 Minor Permit Modification Approval
Leachate Collection Sidewall Riser Sump (Pump System)
EWS Camden Class II Landfill (Reg. Number IDL 03-0212)

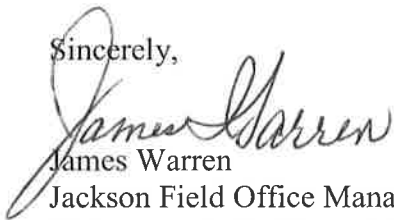

Dear Mr. White:

This letter is in response to a minor modification request dated August 4, 2014. Per Rule 0400-11-.01-.02(6)(b)5 of the Solid Waste Processing and Disposal Regulations, the Tennessee Division of Solid Waste Management (DSWM) has reviewed your written request for a Minor Permit Modification of the EWS Camden Class II Landfill (EWS). The modification consists of an alternative leachate collection sidewall riser sump design.

The Division hereby notifies you of the results of this review in accordance with Rule 0400-11-.01-.02(6) (b) 2(ii). The Division approves the above referenced Minor Permit Modification for the EWS Camden Class II Landfill. Also with regard to the Phase 4 project and prior to its construction, EWS must field-locate and delineate an existing local utility water line that was only recently identified near the Phase 4 northern perimeter.

If you have any questions regarding this letter, feel free to contact this office at (731) 512-1337.

Sincerely,

James Warren
Jackson Field Office Manager
Division of Solid Waste Management
