Re: Environmental Waste Solutions IDL 03-0212
Permit elevations – Cell 1

Dear Mr. Sohr:

The Division of Solid Waste Management requested survey information on Cell 1 Phase III of the EWS Class II Disposal Facility in a letter dated November 2, 2011. We received this information in the form of a drawing submitted on your behalf by Mr. Jo House with House Engineering, LLC on January 31, 2012. The survey shows an apparent over-fill on both the east and south slopes of the landfill as compared to the approved final contours in the permit.

Therefore, please submit a plan to either modify the current contours or to restore the existing slopes to comply with the permit. This plan shall include detailed operational procedures and engineering drawings, as appropriate, and shall be submitted to the Jackson Field Office within 45 days.

Your cooperation in this matter is appreciated. If you have any questions concerning this letter, please contact me at (731) 512-1337.

Sincerely,

James W. Warren
Environmental Field Office Manager
Division of Solid Waste Management
