Dear Mr. Mann:

The Division of Water Resources (Division) received an amended hydrologic determination report, submitted on behalf of McMinn County, for the referenced project on June 22, 2022. The Division accepts the determinations made for the five streams, six wetlands, two wet weather conveyances, and single jurisdictional pond described in your report.

Any alterations to designated streams or wetlands may only be performed under the coverage of, and conformance to, a valid Aquatic Resource Alteration Permit (ARAP) issued by the Tennessee Division of Water Resources. Any alterations to wet weather conveyances must be made in accordance with the requirements of Tenn. Code Ann. § 69-3-108(q).

Please be aware that hydrologic determinations are advised and governed by Tennessee Department of Environment and Conservation (TDEC) rules and regulations and therefore only apply to the State's permitting process. Water features located onsite may also be considered jurisdictional Waters of the United States; therefore, alterations to them should only be performed after consultation with the U.S. Army Corps of Engineers (USACE).

I appreciate the opportunity to assess the site prior to site plan finalization. Because natural variation and human activities can alter hydrologic conditions, the Division reserves the right to reassess the status of these water features in the future. If you have any questions concerning this email; or need further information, please contact me at 423-497-6125 or by email at Jason.Dees@tn.gov.

Sincerely,

Jason Dees, QHP  
Division of Water Resources
