Good Morning Mr. Jason Dees

I am emailing you on behalf of the staff of GEOServices regarding the features you identified in the attached document. Unfortunately, we did not see the wetland feature in the southeast portion of the parcel nor the channel in the northwest based off our review of various TOPO, Aerial, Wetlands, and NHD Maps before arriving on site.

The pond features near the northern boundary have all dried up with the exception of the one mentioned in our original report.

I will be traveling through Etowah tomorrow around 2:00-2:30 and will stop by the site to investigate these features before revising our report. If you are free and would like to meet on-site for concurrence, please let me know.

Thank you!

Clayton James Biden
