

To Mr. Vojin Janjic,

Please, please deny the request of TVA for them to increase the volume of ash purge water.

The water they dirty up in this way eventually makes more toxic both our drinking water and the groundwater that nourishes our plants. Trying to clean up their toxins later is much more difficult, if even possible. I urge you to deny loosening the request of the Kingston Fossil Plant #TN0005254.

Thank you.

Sincerely,  
Elaine Martin
